Your objective when playing Joker Poker at 7 Sultans Online Casino is to obtain a hand comprised of five cards that contains a combination that can win a payout. The better the value of cards in hand the higher your payout will be.

Once you have staked your wager you will receive five cards from the machine. It is your prerogative to select which cards to hold and which to replace. The Joker is wild and can act as any other card to finalize a win. Select the value of coins that you want to use for betting on each round, as well as the number of coins to play. A maximum bet of five coins ensures that you win the top most amounts at all times.

The round is over if you do not get a winning sequence but if you win you can select to double it and play that feature or you can accept the win by collecting it.
